

VALENT VX-12: BIG VALUE IN A SMALL PACKAGE

FEATURE-RICH WHILE COMPETITIVELY PRICED

Valent's new 3-7 ton DOAS unit delivers unmatched features and quality at an affordable price. Features available on Valent's smallest unit include:

- **Inverter scroll compressor.** Many manufacturers offer this quiet, efficient compressor, but only as an option with added cost. The Valent VX-12 comes standard with this industry-leading technology.
- **High turndown furnace.** Valent offers a 16:1 turndown furnace to maintain comfortable discharge air temperatures at part-load conditions.
- **Ultra-quiet and efficient condenser fans.** The Valent serrated fan blade design is up to 12 dB quieter than a traditional condenser fan and is standard on every unit. Also, the VX-12 condenser fan always has an EC motor, further improving performance.
- **Horizontal return.** Installation flexibility is required for many jobs and the VX-12 offers the traditional vertical supply and return or the highly desired horizontal supply and return, not widely available.

The Valent VX-12 is small in size but big in value, and includes a standard inverter scroll compressor, quiet and efficient condenser fan with EC motor, and an available high turndown 16:1 furnace.

VALENT VX-12 SPECIFICATIONS

Airflow: 500–2,500 cfm

Cooling: 3–7 tons packaged DX

Heating: Gas (16:1 turndown available) and electric

Compressor: Inverter scroll standard

Condensing fan: Serrated fan blades, ultra-quiet operation, EC motor standard

Duct connections: Vertical and horizontal
